**For Immediate Release**

## Traffic Diversion for “Ex-Sentral 13” Emergency Response Exercise

**Kuala Lumpur Sentral CBD, 12 June 2013** – We wish to inform all motorists that traffic will be diverted away from the main entrance of Stesen Sentral Kuala Lumpur (SSKL) to allow an emergency response exercise to be carried out from 11.30pm on 14 June to 3am, 15 June.

The emergency exercise called “Ex-Sentral 13” will be conducted within SSKL and will involve cordoning off a whole stretch of road in front of the station’s main entrance, adjacent to the Hilton KL and Le Meridien hotels.

Auxiliary Police (AP) will be posted at either end of the closed stretch to redirect traffic and allow police, firefighters and emergency medical teams to park their vehicles along the main entrance, in order for them to be close to a “fire” incident that is the scenario for the exercise.

All access roads into Kuala Lumpur Sentral CBD from Jalan Travers, Jalan Damansara, Lebuhraya Mahameru and Jalan Tun Sambanthan will still be opened but motorists are advised to follow the directions given by APs at five roadblocks set up around the station.

For motorists who want to send or fetch passengers from the station, a special pick-up and drop-off zone will be provided in front of the 1 Sentral office tower (*refer location map*). The fastest and shortest access to the pick-up zone will be via Jalan Tun Sambanthan.

We apologise for any inconvenience caused by the traffic diversion, and we seek your cooperation to allow smooth running of the emergency exercise that will test the overall protocols and standard operating procedures under the Emergency Response Plan for SSKL. For further information please talk to the Duty Officer in charge by dialing 013-3300077.

**-ends-**

#### **About Kuala Lumpur Sentral**

Kuala Lumpur Sentral is the exclusive urban centre built around Malaysia's largest transit hub, offering global connectivity, excellent investment opportunities, business convenience and an international lifestyle. A phased development, it will be completed in 2012. It features an integrated self-contained city concept comprising corporate office towers and business suites, international hotels, luxurious condominiums and a shopping mall. Kuala Lumpur sentral provides a nucleus centre with six rail networks converging at Stesen Sentral, the KL City Air Terminal and the KL Monorail, as well as connectivity to major arterial roads of Kuala Lumpur.
